- Headphone socket: Yes
- Power requirements: Local mains supply - factory configured to your country's standard
- Power consumption: less than 700mA at 9V
- Amplifier: 6W Class D mono audio amplifier
- Speaker: 4ohm 90mm diameter high-quality circular cone
- Cleaning: Wipe down with a damp cloth (not waterproof)
- Country of Origin: Wales, United Kingdom

The player has been designed with the minimum of controls and has been extensively tested as well as trialled by the Bath Institute of Medical Engineering (now 'Designability').

On the back panel there are additional facilities for particular personal requirements. If headphones are required, then the green socket accepts a stereo jack-plug. (Note: headphones can be extremely loud and cause hearing damage). For people with dexterity problems rather than dementia related conditions the 'ON/OFF' control and 'NEXT TUNE' buttons can be over-ridden by means of remote switches plugged into the two available sockets (note: the lid has to be closed for these controls to work).

Note: E2L Limited reserves the right to change the specification at any time.
